Our parent support groups are comprised of parents, grandparents, therapists, teachers, advocates and organizational representatives. We welcome all diagnoses and different abilities where there is a want or need for support. Because so many issues cross the barriers of diagnoses, families with children having lesser known, represented or supported medical diagnoses find a plethora of information, networking opportunities and fun events.

We are always looking for more families to connect with - Autism, Asperger Syndrome, Cerebral Palsy, Down Syndrome, Tourette Syndrome, Traumatic Brain Injury, Williams, Fragile-X, Fetal Alcohol, ADD/ADHD and more.

Topics range from IEP meeting help, advocacy, nutritional allergies, various types of allopathic and alternative care, workshops, legislative impact, transitional assistance, insurance, respite, child creations (artistic and organic) - the list goes on! We are kid-friendly and try very hard to provide care for the kids free of charge to families. Sometimes we sponsor speakers, sometimes we host events, other times we just chat and end up being accompanied outside the closing doors to continue the discussion for another hour in the parking lot. There is a lot of great energy and caring and the fact is - we just understand.

Dads have an option for "Fathers Only" through FathersNetwork.org! Soon we will offer online support and mentoring statewide for those wishing to start their own branch of EFN.

Join us, won't you?
